margin of error is +/- 3.5 percentage points.

nt of voters have a favorable view of Booker, the former mayor of New

-continued from page -

The Democrat is drawing support from across demographic groups, leading among all age groups, racial and ethnic categories, income levels and education levels. Booker is supported by more than 50 percent of both men and women.

Fifty-three percent rate Booker's job performance in the Senate as excellent or good, slightly higher than the 50 percent found in two previous Stockton Polls.

Methodology

The survey was conducted by the Stockton Polling Institute of the William J. Hughes Center for Public Policy (www.stockton.edu/hughescenter). Live interviewers on the Stockton campus called both landlines and cell phones from Oct. 18 –22, 2014. The poll was conducted with 806 adults who are likely voters. The poll's margin of error is +/- 3.5 percentage points at a 95 percent confidence level. MOE is higher for subsets. Data are weighted based on United States Census Bureau demographics for the New Jersey population.
